

JOSEPH ADIRIMOR

Front-End Web Developer • Aspiring App Developer • Content Creator

Nigeria • +234 807 500 6344 • adirimorjoseph@gmail.com • github.com/josephcodes28

PROFILE

Front-End Web Developer and Content Creator focused on building modern, responsive and user-friendly websites. Experienced with HTML, CSS and JavaScript through hands-on projects, including a responsive restaurant website with menu filtering and WhatsApp ordering. Continuously developing application-development and digital-product skills while building practical solutions for businesses, brands and individuals.

CORE SKILLS

- HTML5 and semantic website structure
- CSS3, responsive design and mobile-first layouts
- JavaScript and interactive web functionality
- Website deployment and project workflow with GitHub and Vercel
- Content creation for YouTube, Facebook, TikTok and other social platforms
- Communication, problem solving, time management and teamwork

PROJECTS

Taste Haven Restaurant Website — Responsive restaurant website built with HTML, CSS and JavaScript. Includes a digital menu, category filtering, mobile navigation, order interaction and WhatsApp ordering. Deployed with Vercel.

Personal Portfolio Website — Responsive portfolio website showcasing professional services, skills, projects, CV and contact channels.

SERVICES

- Responsive website development for businesses, brands and individuals
- Landing pages and professional portfolio websites
- Interactive front-end web experiences
- Digital content creation

EDUCATION

Secondary School Education

PROFESSIONAL GOAL

To grow into a professional software and application developer while delivering reliable digital products and websites for clients and remote teams.
